

BLEACHAIR STANDARD

The patented BleaChair is the first and only chair designed to code compliantly fit in the standard bleacher tread spacing of 24". The compact design allows for a comfortable lumbar support which alleviates the pain associated with sitting on a standard bench. Constructed of durable high impact polypropylene and guaranteed for 3 years of UV color resistance the BleaChair is a cost effective seating option for any application.

Fits in 24" tread depth and is perfect for VIP/ Alumni sections and reserved seating. The chair installs easily to concrete, aluminum, and wood benches and is perfect for new construction or retrofits of existing facilities. BleaChair utilizes a sponsorship oval on the front and back of the chair, allowing for fundraisers through booster clubs, alumni, or corporate sponsorship.

FEATURES

- Designed with high mechanical resistance and durability via an internal rib system.
- Thermoplastic material is UV resistant for color fastness in all environments
